Opening day is an introduction where the players get their jerseys and balls, then play group games.

The next few weeks are group sessions where the clinic director and the coaches can adjust who plays against who based on availability, as team sizes adjust at the season start. This is especially valuable for the coaches who have very small teams, or very large teams spread across both hours.

The remainder of the season will feature small-sided soccer games designed to introduce our youngest players to team experiences, build familiarity with the beautiful game, and plant the seeds for a love of soccer.
